unified imaging

SHARED WITH YOU BY

RALEIGH NEUROLOGY ASSOCIATES, P.A.

Syndee Givre, MD, PhD

Holly Hess Ophthalmic Technician
hhess@raleighneurology.com

Send the photos, OCTs and visual fields **ahead of the visit.**

Your patient's diagnostic images can be waiting for Raleigh Neurology **before the appointment** — shared at full resolution and in color, so nothing is lost on the way over. HIPAA compliant, at no cost to your office.

> **Your patient's visit with Raleigh Neurology picks up where yours left off.**

Sending the images

1. Go to **sweater.unified.gallery** and click **Sign in**.
2. Click **Sign Up**, then pick whichever suits your office:

   - **Google** — one click, nothing to remember
   - **Microsoft** — one click, for Microsoft 365 offices
   - **Email link** — we email you a secure link
   - **Email & password** — confirm your address by email

3. Name your organization: we recommend using your **practice name**.
4. Create a **new patient**.
   Have DICOM images to upload? No need to create the patient first — just drag and drop the images into Unified, and the patient details will auto-fill from the file once it's saved.
5. Upload the patient's images from your computer and click **Save**.
6. **Ready to share?** Open the patient's chart, click **Collaborate**, and type **hhess@raleighneurology.com** as the recipient. You may also add a note such as the reason for referral. Then click **Share**.
   If the chart belongs to the patient being shared, click **Yes**.

Is this secure?

Unified is **HIPAA compliant**. The images travel through the platform rather than as email attachments, and only the recipient can open them.

Want this to happen on its own?

We can connect the imaging equipment you already own, so images land in Unified without anyone uploading anything. Email us for a quote today.

Questions, or want a hand with the first one?

Send us an email to schedule time and walk you through it.
